

Swiss Arabian storefront — walkthrough

Home page

Overview of the landing page — hero, collections, best sellers, and merch rails. This is where the shopper starts.

- **Navigation** — comes from admin, according to the country. The menu updates when the market changes.
- **Products in navigation** — best sellers of that collection. Live catalog sort, not static cutouts.
- **Search** — predictive search. Empty field shows recent searches and an advertising collection (new launches), not a full catalog dump.
- **Advertising collections** — merch rails on home (and later on PDP and cart). Insider is in progress.
- **Country change** — products, currency, delivery fee and ETA follow the selected market.

Listing page

Product listing for all products, a collection, or a category.

- **Infinite scroll** — more products load as you scroll. No page buttons.
- **Filters** — price, concentration, house / collection, notes, and sort (newest, price, bestselling where the API supports it).
- **Tags** — live catalog tags on cards (Best Seller, New, and others). Not guessed from the product name.
- **Wishlist** — heart on the card, for logged-in customers.

Product detail page

Full product view from the catalog API.

- **Dynamic details** — name, price, images, size, and notes / family from product metafields.
- **Shipping promise** — delivery days and free-shipping threshold from the market. Not hardcoded copy.
- **Reviews** — stars and carousel from that product's approved reviews. Empty state hides the block — no fake ratings. Write a review after login (verified purchase).
- **You may like** — advertising collection on the product page.

Cart

What happens after add to bag.

- **Free shipping** — progress bar toward the free-shipping threshold.
- **Layer your scents** — advertising collection in the mini bag.
- **View bag** — full cart page.
- **Don't miss add-ons** — advertising collection on the cart page.
- **Discount + promo code** — applied campaigns and coupon on cart and checkout. Totals come from the server.

Checkout page

Place the order.

- **Address** — Google Places autocomplete.
- **Shipping method** — live delivery options for the market.
- **Billing information** — same as shipping, or a separate billing address.
- **Payment method** — Paymob (hosted page) and Stripe (inline card).
- **Order placement** — confirmation and tracking after payment.

Account section

Logged-in customer area.

- **Auth** — register, login, and forgot / reset password.
- **Order history** — past and current orders.
- **Order tracking** — status and track-by-order.
- **Addresses** — address book with Places autocomplete.
- **Profile** — name, email, and security (password / sessions).
